

York Hospital Imaging Services... What Happens Next?

Thank you for choosing York Hospital for your Imaging needs. Now that we have obtained your images for diagnostic testing, our imaging staff will proceed with expediting the reporting process.

How long does it take to get results?

Once images are obtained, a board certified Radiologist will interpret the images. A formal report is then generated and automatically sent to your provider's office. Copies of reports are also sent to any additional providers involved in your care as requested by you or your doctor.

How do I request a copy of my results?

We would be happy to provide you a copy of your test results. Simply fill out a "Consent for Release of Confidential Health Information" form available at any of our locations. Once the Radiologist has reviewed your images, a written report will be sent to you or you may visit any of our imaging locations (listed below) to receive a copy in person. If you wish to receive by mail, please allow 2-4 days for delivery. To protect the privacy of our patients, we are not able to provide results via e-mail or general fax at this time.

What if I have questions about my test results?

If you have questions about the interpretation of your images, please understand that our imaging staff are not permitted to, nor qualified to, interpret any imaging results. Therefore, it is best for you to contact your ordering provider for an explanation on how these results may be used to care for you.

Who can I contact about my experience?

All of our staff members strive to make your imaging experience exceptional. Your opinion is very important to us. Please feel free to share your thoughts about any part of your experience on our York Hospital Patient Survey, or feel free to contact:

Terri Cataldi, R.T.R.

Leader for Diagnostic Imaging Services
(207) 351-2346 or tcataldi@yorkhospital.com.
